UNIVERSITY SEAL AND MOTTO

Soon after Northwestern University was founded, its Board of Trustees adopted an official corporate seal. This seal, approved on June 26, 1856, consisted of an open book surrounded by rays of light and circled by the words *Northwestern University, Evanston, Illinois*.

Northwestern
University

Thirty years later Daniel Bonbright, professor of Latin and a member of Northwestern's original faculty, redesigned the seal, retaining the book and light rays and adding two quotations. On the pages of the open book he placed a Greek quotation from the Gospel of John, chapter 1, verse 14, translating to *The Word . . . full of grace and truth*. Circling the book are the first three words, in Latin, of the University motto: *Quaecumque sunt vera* (Whatever things are true). The outer border of the seal carries the name of the University and the date of its founding. This seal, which remains Northwestern's official signature, was approved by the Board of Trustees on December 5, 1890.

The full text of the University motto, adopted on June 17, 1890, is from the Epistle of Paul the Apostle to the Philippians, chapter 4, verse 8 (King James Version).

*Whatsoever things are true,
whosoever things are honest,
whosoever things are just,
whosoever things are pure,
whosoever things are lovely,
whosoever things are of good report;
if there be any virtue,
and if there be any praise,
think on these things.*

MICHAEL H. SCHILL

President

Michael H. Schill took office as Northwestern's 17th president on September 12, 2022. He also serves as a professor in the Northwestern Pritzker School of Law.

He previously spent seven years as president of the University of Oregon, where he raised the university's profile in teaching, research, innovation, student access, and diversity. Under Schill's leadership, UO built the Phil and Penny Knight Campus for Accelerating Scientific Impact, increased its four-year graduation rates by 10 percentage points, and launched the Ballmer Institute for Children's Behavioral Health at a new campus in northeast Portland. Schill also led the extension and historic close of the university's fundraising campaign in 2021, which exceeded its goal with \$3.2 billion total raised.

Schill is a nationally recognized expert in property, real estate, and housing law and policy. His work includes studies of the determinants of value in condominium and cooperative housing, the impacts of housing programs on property values, the enforcement of Fair Housing laws, mortgage securitization, and the effects of housing market regulation. *Property*, which he coauthored with James Krier and Greg Alexander, is one of the most widely adopted casebooks in American law schools.

He served as dean and professor at the law schools of the University of Chicago and UCLA, and he has held tenured faculty positions at New York University and the University of Pennsylvania. In 2004 Schill founded NYU's Furman Center for Real Estate and Urban Policy, which has become one of the nation's leading research centers on housing and the built environment.

He has served on several nonprofit boards and civic bodies, including Argonne National Laboratory, ITHAKA, the Chicago Innovation Exchange, and the Housing Preservation Compact of Chicago.

Before beginning his career as a professor, Schill served as law clerk to the Honorable Marvin Katz of the Eastern District of Pennsylvania and was a real estate attorney at the New York City law firm of Fried, Frank, Harris, Shriver and Jacobson.

Schill graduated with an AB in public policy from Princeton University in 1980 and a JD from Yale Law School in 1984.

PETER J. BARRIS

Chair, Board of Trustees

Peter J. Barris joined New Enterprise Associates (NEA) in 1992 and was the firm's managing general partner from 1999 to 2017. Having retired in 2019, Barris now serves as chairman emeritus. During his 18 years at the helm, NEA's assets under management grew from \$1 billion to more than \$20 billion and the organization scaled its operations to become one of the world's largest venture capital firms. Under Barris's leadership, NEA invested in such industry-transforming technology companies as CareerBuilder, Tableau, Groupon, Jet.com, Juniper Networks, Salesforce.com, TiVo, WebMD, and Workday. He has been named to the Washington Tech Council's Hall of Fame, to the Washington Business Hall of Fame, and several times to the Forbes Midas List of top technology investors. Barris has personally led investments in over three dozen technology companies that have successfully completed public offerings or mergers. He currently serves on the board of directors for the public company Sprout Social (SPT). Barris also serves on the boards of the Brookings Institution, In-Q-Tel, and several private companies.

Prior to joining NEA, Barris was president of Legent Corporation (LGNT) and senior vice president of the Systems Software Division of UCCEL Corporation (UCE). Both companies were ultimately acquired at valuations that were record-breaking for their time. Earlier, he spent almost a decade at General Electric Company in a variety of management positions, including vice president and general manager at GE Information Services. In addition to chairing the Northwestern University Board of Trustees, Barris has served on the executive committee of the board of the National Venture Capital Association and the Tuck School board of overseers and was a founding member of Venture Philanthropy Partners, a philanthropic organization in the Washington, DC, area.

Barris received his BSEE from Northwestern University and his MBA from the Tuck School of Business at Dartmouth.

LAND ACKNOWLEDGMENT

To recognize the land is an expression of gratitude and appreciation to those whose territory we reside on—and a way of honoring the Indigenous people who have been living and working on the land from time immemorial. It is important to understand the long-standing history that has brought us to reside on the land and to seek to understand our place within that history.*

The Northwestern campus sits on the traditional homelands of the people of the Council of Three Fires—the Ojibwe, Potawatomi, and Odawa—as well as the Menominee, Ho-Chunk, and Miami tribes. It was also a site of trade, travel, gathering, and healing for more than a dozen other Native tribes; the state of Illinois is still home to over 100,000 tribal members.

Consistent with the University’s commitment to diversity and inclusion, Northwestern works toward building relationships with Native American communities through academic pursuits, partnerships, historical recognitions, community service, and enrollment efforts.

HISTORY OF NORTHWESTERN

The founding of Northwestern University by nine Methodists embodied a mixture of religious conviction and secular optimism that is uniquely American. Meeting above a hardware store in the burgeoning frontier town of Chicago, these nine resolved on May 31, 1850, to establish an institution of “the highest order of excellence.” The 1851 Act of Incorporation creating Northwestern University contained a provision reflecting the strong religious beliefs of its founders but requiring no particular religious faith of students or members of the faculty.

In 1853 the University bought and began to develop 379 acres of lakeshore farmland. The town that grew up around Northwestern was named for John Evans, one of the University’s founders. By 1855 Northwestern had completed its first building and opened a College of Liberal Arts. By 1900 the University encompassed six additional schools, including the medical and law schools in Chicago. Since the establishment of the Graduate School in 1910, Northwestern has provided graduate as well as undergraduate instruction, emphasizing research along with teaching.

The University’s development since then has paralleled the growth of metropolitan Chicago. Today Northwestern is a private research university of distinction, with 11 academic divisions located on two lakefront campuses in Evanston and Chicago as well as Northwestern University in Qatar, which opened in Doha in 2008. Northwestern’s vision of excellence—although faithful to its founding—invigorates a territory far beyond the old Northwest Territory through the accomplishments of its alumni and by virtue of a distinguished faculty and high-achieving student body drawn from across the nation and around the world.

ACADEMIC DRESS

Modern academic attire originated in the medieval universities of Europe, where gowns were worn daily to provide warmth in poorly heated buildings and to differentiate scholars from fellow citizens. Two English universities, Oxford and Cambridge, are particularly noted for developing the authentic academic costume, which has changed only slightly through the centuries.

In the United States most academic dress follows the general provisions of the Intercollegiate Code of 1895, which was revised in 1932 and again in 1959. Under this code the gowns' trim and sleeve design indicates the level of the degree. The bachelor's gown has pointed sleeves and is worn closed; the master's gown has oblong sleeves with an arc at the bottom and may be worn open or closed; and the doctor's gown, which may also be worn open or closed, has velvet facings down the front and three velvet bars on the bell-shaped sleeves. This velvet trim may be black or the prescribed color of the academic area. Though the recommended color for gowns is black, Northwestern University (like many institutions) has adopted a colored gown to reflect the school's color. All participating candidates wear a custom purple gown featuring the University crest.

The style of hood identifies the level of the degree, the school that granted it, and the academic area. Hood length and border width show the level of the degree. The master's hood is three and one-half feet; the doctor's is four feet. The velvet border of the hood is three and five inches wide for the master's and doctor's degrees, respectively. The hood is lined with silk in the official color of the school. At Northwestern the hood is lined in purple (the school's color) and gold. The color of the hood's border—and at Northwestern the color of the cap's tassel as well—indicates the academic area. Tassels feature the Northwestern seal signet. At Northwestern the colors for the Graduate School constitute an exception; tassels are black, but the border color of the hood indicates the specific degree awarded. Bachelor's degree regalia include a souvenir stole.

The square black mortarboard is the recommended cap, although some schools have adopted other styles. Caps are worn throughout the Commencement ceremony, except that men remove them for the national anthem.

At Northwestern University members of honor societies may be recognized by the honor cords, medallions, and stoles worn.

The tassels and borders of the hoods are the following colors:

Judd A. and Marjorie Weinberg

DAVID REITZE

Doctor of Science

David Reitze is a world-renowned leader in gravitational-wave astronomy, instrumentation, and detection. Since 2011 he has served as research professor of physics at the California Institute of Technology and executive director of Caltech's Laser Interferometer Gravitational-Wave Observatory (LIGO) Laboratory, where his National Science Foundation-funded research is expanding a new field of astrophysics by developing ultrasensitive gravitational-wave detectors. In 2016 his team reported the first direct detection of gravitational waves, produced by the collision and merger of two black holes. Previously worked for Bell Communications Research and the Lawrence Livermore National Laboratory before joining the faculty of the University of Florida, where he rose to the rank of professor. Recipient of the National Academy of Sciences' 2017 Award for Scientific Discovery for his LIGO leadership, Reitze is a member of the Associated Universities for Research in Astronomy's board of directors and an elected fellow of the American Physical Society, Optica, and the American Association for the Advancement of Science. He earned a BA in physics from Northwestern and a PhD in physics from the University of Texas at Austin.

Presented by Vicky Kalogera, Daniel I. Linzer Distinguished University Professor, Physics and Astronomy, Judd A. and Marjorie Weinberg College of Arts and Sciences

A century after Albert Einstein predicted the existence of gravitational waves, your laboratory dramatically validated that prediction with the first of many direct gravitational-wave detections. Your pioneering work has led to the development of exciting new research areas in gravitational-wave astrophysics and multi-messenger astronomy, and your leadership as chair of the Gravitational Wave International Committee has extended your influence worldwide. Your alma mater is delighted to add to your many honors.

50TH REUNION CLASS MESSAGE TO THE CLASS OF 2024

“Life is not measured by the number of breaths we take but by the moments that take our breath away.” —Often attributed to Maya Angelou

Dear Class of 2024,

Have you ever thought about how well-intentioned pieces of advice often contradict one another?

“Good things come to those who wait” vs. “the early bird catches the worm.”

“If at first you don’t succeed, try, try again” vs. “quit while you’re ahead.”

“Nothing ventured, nothing gained” vs. “better safe than sorry.”

We will not be giving you any advice here—you will get it elsewhere. Instead, we have two requests.

We ask that you pause to reflect on your past.

Before you take that next step on your educational journey, begin your new job, meet new friends, make your new apartment your home, and possibly relocate to a new city, take some time to focus on the Northwestern moments you want to remember forever so that they will always be a part of who you are. What moments took your breath away?

What did you learn about yourself? Were you surprised?

Did you meet someone you could talk with for hours?

Did you try something new?

Did you have an “aha” revelation in class?

Did you find a shoulder to lean on and a dance to rejoice with?

Are there people you want to thank for helping you be you? This could include any of your 1,024 ancestors over 10 generations whose hard-won accomplishments and tenacious dreams resulted in you being on this earth.

We ask that you think about someone else’s future.

Consider how you can make a difference in the life of another person. It might be a small gesture to you, but it could mean the world to them.

When can you support someone who wants to take the next step?

How will you be a good friend?

Do you need to offer any apologies?

How can you inspire someone?

Will you volunteer your time?

How can you help someone celebrate?

We celebrate your Northwestern moments and the impact you will make on the world, a world that is filled with an abundance of moments that uplift you and take your breath away.

Welcome to the community of Northwestern alumni who continue to share a passion for learning, inspiring, and serving others. We extend our sincere wishes for fulfillment, peace, and joy as you embark on your future.

Congratulations! Go ‘Cats!

Edith Howard Bostic ’74

Kathryn Kimura Mlsna ’74, ’77 JD (’03, ’09, ’12 P)

OUR SHORT STORY

In 1970, separated by many miles, we traveled to Evanston to begin our first year at Northwestern. Little did we know that it was the beginning of a beautiful 54-year friendship that continues to this day. We were inspired by the people we met and the professors who taught us—we also learned how we could make the world a better place.

We continued our education—one a few inches from earning her PhD in education and the other earning her Northwestern law degree—and then raised our children, who are now fourth-generation college graduates. We have had successful careers and traveled the globe, and we treasure our countless amazing experiences, both past and yet to come.

These days, we wear purple proudly as Northwestern Alumni Association Alumni Regents and recipients of the NAA Alumni Service Award for our extensive volunteer contributions to the University. We also continue to create Northwestern moments that take our breath away.
